```
from the normalized library NCI_CGAP_GC4 was prepared, and so circles were made in vitro. Following HAP purification, this DNA was used as tracer in a subtractive hybridization reaction. The driver was PCR-amplified cDNAs from a pool of 5,000 clones made from the same library (cloneIDs 1257096-1228631, 1469064-1470983, and 1475592-147673). Subtraction by Bento Soares and M. Fatima Bonaldo.

Equal amounts of plasmid DNA from three normalized librariess (fetal lung NbHL19W, testis NHT, and B-cell NCI_CGAP_GCBI) were mixed, and ss circles were made in vitro. Following HAP purification, this DNA was used as tracer in a subtractive hybridization reaction. The driver was PCR=amplified conns propols of 5,000 clones made from the same 3 libraries. The pools consisted of 1.M.A.G.E. clones 297480-302097, 682632-687239, 1.M.A.G.E. 28711, and 729096-731399, Subtraction by Bento Soares and M. Felima Bonaldo.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                /clone_lib="NCI_CGAP_SG2"

```
the farks demonstration of a full-length mouse conditions of the farks demonstration of a full-length mouse conditions of the functional annotation of a full-length mouse conditions of the functional annotation of a full-length mouse conditions of the farewark. Akahira, S., Akimura, T., Aono, H., Aral, A., Arakwark, Arakwark, Bono, H., Brownstein, M., Bult, C., Carninci, P., Fukuda, S., Fukunish, Y., Furuno, M., Hanagaki, T., Hara, A., Hayatsu, N., Hill, D., Hiramoto, K., Hiraoka, T., Hanagaki, T., Rato, H., Kauda, J., Kojima, Y., Furuno, H., Kouda, M., Koya, S., Kurihara, C., Matsuyama, T., Mayazaki, A., Nishi, K., Nomura, K., Kurihara, C., Matsuyama, T., Mayazaki, A., Nishi, K., Nomura, K., Kurihara, C., Matsuyama, T., Mayazaki, A., Nishi, K., Sano, H., Saaito, R., Sakai, C., Sakai, C., Sakai, D., Schrimi, L., Shibata, K., Shibata, Y., Shinagawa, A., Takahashi, F., Tanaka, T., Tajima, Y., Toya, T., Yamamura, T., Yamanaka, I., Yasunishi, A., Yoshida, K., Yoshino, M., Muramatsu, M. and
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       [5] GAGAGAGAGAAGCATCTATTTTTTTTTTTVN 3'], cDNA was prepared by using trehalose thermo-activated reverse transcriptase and subsequently enriched for full-length by cap-trapper. CDNA went through one round of normalization to Rot = 5.0 and subtraction to Rot = 25.0. Second strand cDNA was prepared with the primer adapter
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          /tissue_type="tongue"
